## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art does not disclose applicant's "process" ("process" being synonymous with "method"), as claimed, wherein the invention can be distinguished from prior art by "pre-coating" (i.e. "coating" before another step) using an "inorganic silicon reactant" followed by "depositing silicon nitride using an organic silicon reactant," the organic silicon reactant being exemplified by BTBAS.

Applicant's invention provides a method for the operation of a reaction chamber for the deposition of nitride films using BTBAS and ammonia as precursors, that allows for the performance of an economically feasible number of production runs between cleaning cycles. Another advantage is that the pre-coating method is effective for increasing and maintaining the deposition rate of low temperature depositions, following a cleaning of the reaction chamber [0008].

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
